

_ TRACE ELEMENTS

They have been used since ancient times (thalassotherapy, spa treatments, mud therapy, holistic medicine and oligotherapy). Just a tiny amount is enough to catalyse reactions in our body and bring about a “rebalancing” effect. As **gluconates** they improve absorption and skin tolerability.

INDICATIONS:

- Suitable for face and body
- Use a maximum of 30 drops on the face and a maximum of 60 drops on the body
- More than one trace element can be used on the same zone
- A trace element and an essential oil can be used on the same zone

HOW TO USE:

- Using Sikelia cream together with the Manganese Complex trace element boosts prevention of stretch marks even during pregnancy
- Using Magnesium trace element together with Rehydra intensive moisturising cream is an excellent solution for the most demanding tissue
- The Aluminium Complex trace element is an excellent solution for soothing skin (for example after extraction during facial cleansing)

CONTRAINDICATIONS:

None

Remember: product for professional and follow-up home use.
